

Gimme Some Protons

A parody of Gimme Some Lovin' by the Canettes Blues Band

16-bar blues in E

[rhythm, guitar intro x 4]

[organ diddly] Hey! (all vocalists)

The luminosity is rising, there are protons at the door
A hundred inverse femtos, but we're wanting some more
You'd better them in baby, I don't know what they got
But you'd better take it easy, cause the LHC is hot

Chorus

And I'm so glad we made it

So glad we made it

You got to gimme some protons (gimme gimme some protons)

Gimme some protons (gimme some protons)

Gimme some protons, every day

[organ diddly] Hey! (all vocalists)

Well, I'm feeling so good, and the energy is higher
Better take it easy, cause the beam is on fire
Been a long run and we I don't know what to do
Better wait a minute, baby, that could happen to you

[chorus]

[organ diddly] Hey! (all vocalists)

[harmonica solo]

[organ diddly] Hey! (all vocalists)

Well, I'm feeling so good, and the LHC is hot
Better take it easy, cause the beam is on fire
Been a long run and we're feelin' so good
Now, I'm gonna take data, baby, everybody should

[chorus]

[organ diddly]

[abrupt end]
